

The Imaging & Interventional Techniques seminar, consisting of didactic presentations and interactive workshops, will provide a thorough understanding of the ultrasonic interpretation criteria used to define breast anatomy and recognise changes due to benign conditions and early breast cancers.

Imaging strategies for cancer detection will be reviewed and the use of needle biopsy techniques presented from the viewpoint of providing a definitive diagnosis. Scanning and interventional workshops form an important part of the teaching programme, and all participants will be provided with a comprehensive book of educational resource materials.

FACULTY:

Dr Jack Jellins, NSW

Dr Jill Robinson, SA

Dr Paula Sivy, Qld

Ms Judy Bursle, NSW

Dr Allison Rose, Vic

Dr Warwick Lee, NSW

Dr Mona Tan, Singapore

Ms Louise Smalley, NSW

Dr Helen Zorbas, NBCC

VENUE:

Johnson & Johnson Education Institute

1-5 Khartoum Road

North Ryde NSW 2113

REGISTRATION FEE:

\$187.00 inc. GST (a tax invoice will be issued upon receipt of payment.)

Registration numbers will be limited to ensure maximum interaction and participation during workshop sessions.

RSVP:

Friday 20 October, 2000

CME POINTS:

AGENDA

Saturday 11 November, 2000

0800-0830 REGISTRATION & COFFEE

0830-0910

SESSION 1

High Resolution Ultrasound Imaging - *Jack Jellins*

Ultrasonic Anatomy & Scanning Techniques - *Paula Sivy*

0910-1015

SESSION 2

Sonographic Features of Benign & Malignant Masses - *Jill Robinson*

Imaging Strategies for Cancer Detection - *Warwick Lee*

1015-1045

MORNING TEA

1045-1100

SESSION 3

The Need for Guidelines in Breast Disease - *Helen Zorbas*

1100-1230

SESSION 4

Interactive Hands-on Scanning Workshops

1230-1315

SESSION 5

Mammogram & Ultrasound Correlation - *Judy Bursle & Louise Smalley*

1315-1400

LUNCH

1400-1510

SESSION 6

Fine Needle Aspiration & Core Needle Biopsy Techniques

Vacuum Assisted Biopsy Technique - *Paula Sivy*

Diagnostic Triage - *Allison Rose*

1510-1550

Panel Discussion - All Faculty

"Contributions of Tissue Sampling to Definitive Diagnosis"

1550-1610

AFTERNOON TEA

1610-1730

SESSION 7

Interactive Interventional Workshops

The AIMS of IBUS

1.

To improve the standards of breast ultrasound for assessing the breast and its pathology,

2.

To provide high-quality seminars and interactive workshops covering ultrasound, X-ray mammography, magnetic resonance imaging and other investigative techniques,

3.

To evaluate the role of conventional and newer imaging techniques, and

4.

To promote an international forum for exchange of scientific information.

CERTIFICATE OF ATTENDANCE

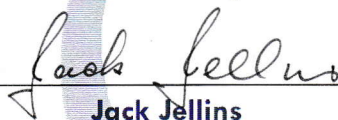

This certifies that

Mona Tan

participated in the BREAST ULTRASOUND SEMINAR "Imaging & Interventional Techniques"
lecture programme and interactive workshops, held on Saturday 11 November, 2000
at the Johnson & Johnson Education Institute, Sydney

SEMINAR TOPICS

High resolution ultrasound imaging, Ultrasonic anatomy & scanning techniques,
Sonographic features of benign & malignant masses, Imaging strategies for cancer detection,
Best practice in breast diagnosis, Mammogram & ultrasound correlation,
Fine needle aspiration & core needle biopsy techniques,
Vacuum-assisted biopsy techniques and Diagnostic triage.

Jack Jellins
Chairman
International Breast Ultrasound School

FACULTY

Judy Bursle (Sydney), David Gillette (Sydney), Jack Jellins (Sydney), Warwick Lee (Bowral),
Jill Robinson (Adelaide), Allison Rose (Melbourne), Paula Sivyver (Brisbane),
Louise Smalley (Sydney), Mona Tan (Sydney), Helen Zorbas (Sydney).
